*Mystery Spill* (Estonia, 2006)

## Preventing and mitigating effects

# Sea Alarm's role

## ■ 24/7 Response

- Advice and assistance
- Sourcing/mobilising international resources

## ■ Preparedness

- Wildlife response planning, training, exercises
- Country Wildlife Response Profiles
- Developing best practice standards

# REMPEC-Sea Alarm MoU Background

- 2009 REMPEC Joint Industry/government workshop conclusion - wildlife protection rarely addressed in national contingency plans

- Action to assist CP's to improve wildlife preparedness by REMPEC-Sea Alarm MoU
- To be signed during the meeting

# MoU Response Services

- CPs can request Sea Alarm to provide MAU wildlife response assistance via REMPEC
  - During initial phase
  - Advice and technical expertise to authorities
  - Assist decision making on response measures to take and possible assistance needed
- Sea Alarm can also provide if needed
  - Remote advice/expertise from Brussels
  - On-site response and mobilising other international wildlife responders

# MoU Preparedness Services

- Assistance with developing oiled wildlife response preparedness
  - Help to develop national wildlife response plans
  - Oiled wildlife response training for pollution response authorities

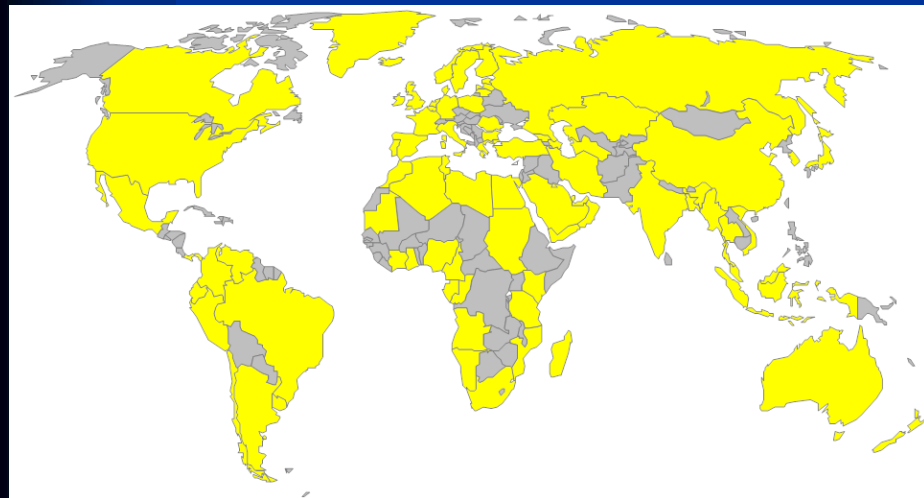

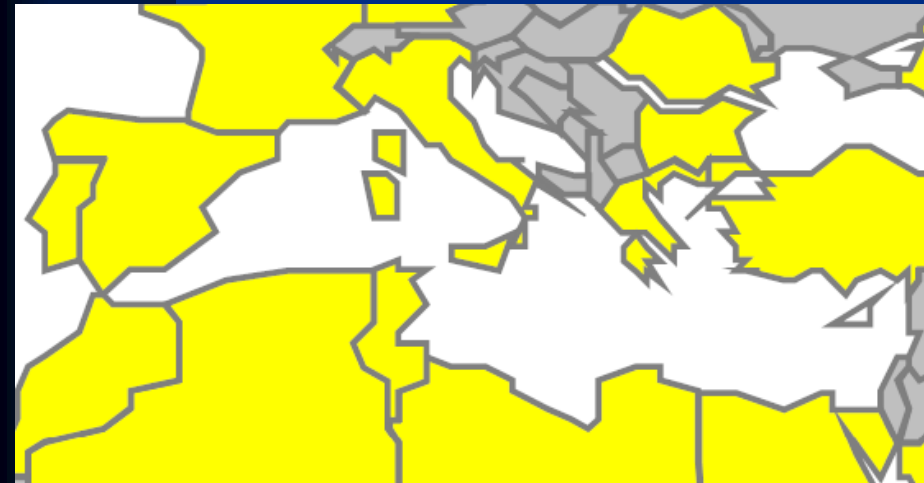

# MoU Preparedness Services

- Sea Alarm Country Wildlife Response Profiles

- Strategy & arrangements for oiled wildlife response
- Relevant authorities and key actors
- Wildlife response capacity

- 10 Med profiles completed

- Website links between Sea Alarm and REMPEC Country profiles

# Thank-you
