EXECUTIVE SUMMARY

REMPEC in cooperation with MOIG and with the participation of the International Petroleum Industry Environmental Conservation Association (IPIECA) and the International Maritime Organization (IMO) organised the Regional Government and Industry Workshop on Cooperation, Preparedness for and Response to Oil Spills in the Mediterranean Sea, which was held in Marseille, from 11 to 12 May 2009. All Contracting Parties to the Barcelona Convention, represented by 38 participants attended the Workshop with representatives from the Mediterranean oil industry (EGPC, Eni, ETAP, Exxon mobil, NOC, Petro-Canada, Shell/STASCO, TANKMED, Total, Marathon and Sonatrach).

The Workshop aimed at strengthening cooperation between governments and the oil industry, concluded with the following set of recommendations for the elaboration of a joint REMPEC/MOIG short/medium and long term programme to enhance regional cooperation in the Mediterranean region:

- to endorse the need of more REMPEC and industry support and joint activities,
- to strengthen the industry network and its interaction with government network,
- to organize on a more regular basis industry and government joint trainings and exercises,
- to organize a joint industry/government Regional Workshop on risk assessment aimed at defining a joint realistic Mediterranean Risk Assessment,
- to develop Standard National Contingency Planning Template with same structure (it was recognized that the current Guidelines were not sufficient),
- to review the Mediterranean Dispersant guidelines with particular emphasise on the decision making process,
- to support the development of waste management plans,
- to centralize existing sensitivity maps on a Geographical Information System hosted by REMPEC,
- to access to reliable and common forecasting models,
- to focus efforts on operational and administrative arrangements to ensure a smooth entry, and exit of regional and international assistance,
- to increase technical assistance to MOIG,
- to improve cooperation on Aerial surveillance, and
- to get better understanding of EMSA's role in particular its support to non EU countries.

I. INTRODUCTION

During the Mediterranean Oil Industry Group (MOIG) - Integration of Emergency Plan Workshop held in Malta, on 10th May 2007, the participants from the Mediterranean coastal States attending the 8th Meeting of the Focal Points of the Regional Marine Pollution Emergency Response Centre for the Mediterranean Sea (REMPEC) and the MOIG's members discussed contingency planning issues and in particular the integration of industry plan in government plan. The main recommendation of the workshop was to organize a joint government-industry workshop on preparedness and response to marine pollution to exchange information on the status of preparedness and response in the region from a government and industry perspective.

Taken these recommendations into consideration REMPEC and MOIG agreed to organize jointly a workshop enabling government and industry representative to meet and discuss about preparedness and response to marine pollution with a view to improve the situation at national and regional level and to enhance cooperation between government and industry.

REMPEC in cooperation with MOIG and with the participation of the International Petroleum Industry Environmental Conservation Association (IPIECA) and the International Maritime Organization (IMO) organised the Regional Government and Industry Workshop on Cooperation, Preparedness for and Response to Oil Spills in the Mediterranean Sea, which was held in Marseille, from 11 to 12 May 2009. All Contracting Parties to the Barcelona Convention, represented by 38 participants attended the Workshop with representatives from the Mediterranean oil industry (EGPC, Eni, ETAP, Exxon mobil, NOC, Petro-Canada, Shell/STASCO, TANKMED, Total, Marathon and Sonatrach). The list of participants is reported in **Annex 1**.

II. PREPARATION OF THE WORKSHOP

REMPEC and MOIG initiated in 2008 an assessment exercise to evaluate the level of response capacity in the region with a view to have an overview of the situation in the Mediterranean Region.

In this connection, REMPEC developed a Country Profile, reproduced in **Annex 4**, and pre-filled it with information available at the Centre prior to submitting the document to each Mediterranean Coastal State for its update and for confirming the validity of the information recorded. All the data will be made available on the new Centre's website which should be operational prior to the end of 2009. The country profiles will be updated on a regular basis by the Mediterranean Coastal States and REMPEC as progress is made and on a regular basis.

MOIG from its end, based on the REMPEC's Country Profile developed a questionnaire, as set in **Annex 5**, aimed at collecting detailed information on the oil industry operating in the region (Off-shore facilities, refineries, ports, etc...). With a view to ensuring a maximum of replies prior to the workshop, an abridged version reproduced in **Annex 6**, was prepared and disseminated to the oil industry members of MOIG and of the International Petroleum Industry Environmental Conservation Association (IPIECA).

MOIG and IPIECA identified 67 high-density tanker routes using International Tanker Owners Pollution Federation Limited's (ITOPF) tanker route 2005 database.

Figure 1. ITOPF tanker route 2005

The routes were crossed with the map of sites handling oil in the Mediterranean produced by the French Petroleum Institute (IFP) and the Centre of Documentation, Research and Experimentation on Accidental Water Pollution (Cedre).

Figure.2. CEDRE/IFP sites handling oil Mediterranean map

This approach enabled the identification of 90 facilities with 42% of refinery, 26% of Oil Terminal, 24% of Ports, and 8% of Offshore Platform.

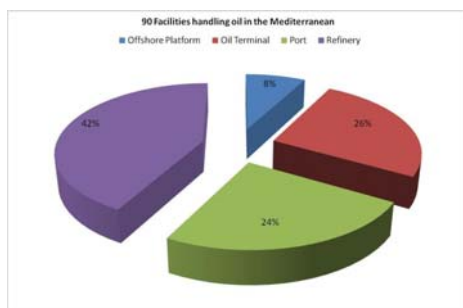

Figure.3. MOIG/IPIECA cross reference result

Amongst the 22 Contracting Parties to the Barcelona Convention 19 returned to REMPEC their Country profiles reviewed and approved. MOIG from its side, with the technical support of IPIECA, received 20 completed assessment questionnaires from the 90 facilities approached.

REMPEC's and MOIG's questionnaires were analysed by the Workshop Steering Committee composed of representatives of REMPEC, MOIG and assisted by IPIECA and consultants selected by REMPEC and MOIG to support the preparation and implementation of this activity. The outcome of

the analysis is reported in the present report under the following six themes which constituted the backbone of the workshop programme reproduced in **Annex 3**:

1. Contingency Planning
2. Risk Assessment
3. Strategy
4. Tier response approach & Responsibilities
5. Resources and Mutual Assistance
6. Training and Exercises

The Workshop Steering Committee discussed the Group Discussion working document REMPEC/MOIG/WG.1/2, the National Consultation working document REMPEC/MOIG/WG.1/3 and the Action Plan working document REMPEC/MOIG/WG.1/4. These documents further described in the chapter III of the present report were disseminated to the participants prior to the event in view of their preparation.

III. AIMS OF THE WORKSHOP

III. 1. Objective of the workshop

The objectives of the workshop were to:

- ✓ Strengthen cooperation between governments and industry in the Mediterranean region
- ✓ Provide recommendation for short/medium and long term activities to enhance regional cooperation and increase the preparedness and response capacity in the Mediterranean.

III. 2. Methodology

The methodology used to achieve this objective, as illustrated on the figure 4, consisted, first in a **pre-workshop assessment** as described above aimed at gathering information at government and industry level on the level of preparedness in the Mediterranean Sea. The data provided by the Mediterranean Coastal States and the oil industry were analyzed to **identify gaps and commonalities at national and regional level from a government and industry point of view.**

On the basis of the outcome of the analysis the topics above mentioned were identified to lead the workshop discussions:

The presentations, the group discussions, the national consultations and the action plans were built on the basis of the same structure composed of these six topics.

The presentations on the six topics were composed of:

- ✓ an **introductory part** on the subject aimed at recalling to the participants the main aspects to consider under each topic,
- ✓ an **overview of the situation** in the Mediterranean region on the different subjects on the basis of REMPEC’s and MOIG’s assessment, and
- ✓ summary of the **main questions** to be answered the following day during the “Group Discussion Session”, the “National Consultation Session” and the “Action Plan” session.

The Group Discussions were aimed at sharing experiences and concerns on a **regional basis** with a view to defining regional conclusion and recommendations.

The **National Consultations** were carried out simultaneously with the group discussions and enabled States and industry to meet, together, the National Consultation Panel composed of a consultant, a representative of REMPEC and a representative of MOIG as reported in table2, for 30 minutes each. Government and industry representatives reviewed their respective questionnaires and further discussed from a **national point of view** the level of preparedness, possible related concerns and any other relevant issues.

During the Action Plan session government and industry representatives of each country were requested, taking into consideration the elements presented, discussed during the workshop, the analysis highlighting gaps and commonalities, as well as their own country/industry profile, to jointly indicate in writing the follow-up actions they consider necessary to improve their level of preparedness and response as well as the cooperation between government and industry. The main objective of this section was to come-up with preliminary **joint action plans at national level** to ensure follow-up of the workshop. The aim was also to obtain in writing **joint government-industry priority needs at national level** for their consideration in future REMPEC and MOIG activities.

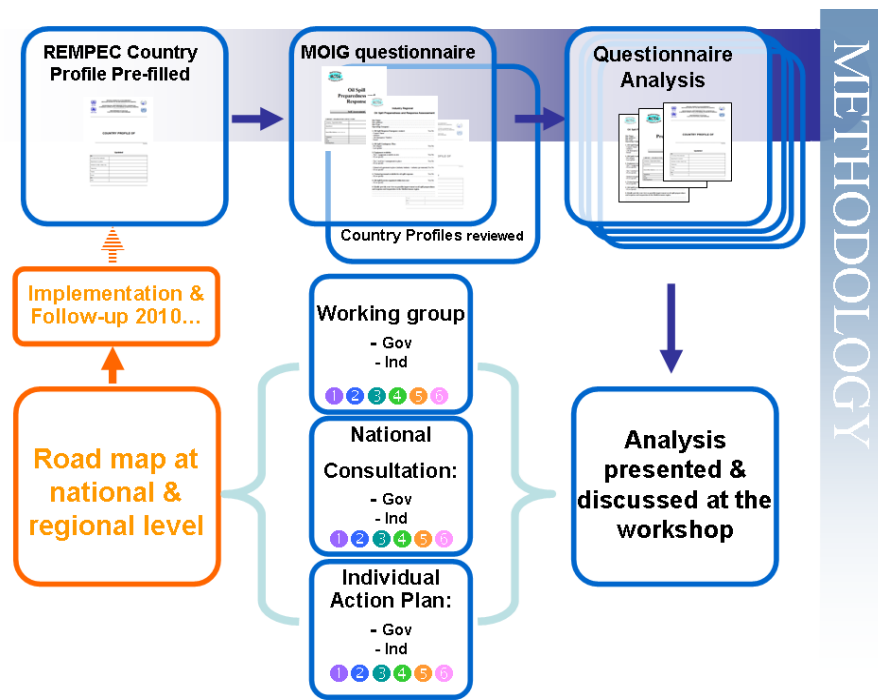

Figure 4. Methodology for continuous joint assessment and improvement on preparedness for and response to oil spill

III. 3. Profiles of Lecturers

Taking into consideration the nature of the workshop REMPEC and MOIG selected a pool of expertise based on their knowledge and experience on:

- ✓ Government preparedness and response approach,
- ✓ Industry preparedness and response approach,
- ✓ Regional and international cooperation,
- ✓ Government and industry cooperation,
- ✓ Mediterranean and other regional context.

The experts who contributed to this activity were separated in three categories speakers, consultants and facilitators and were requested to:

Speaker:

- ✓ Prepare the presentations, considering reference material (“Basic documents, recommendations, principles and guidelines concerning accidental marine pollution preparedness, response and mutual assistance, as well as prevention of pollution from ships, REMPEC Regional Information System (RIS), Part A, 2008”) and use the reference material in the presentation (e.g. “Guidelines for the Use of Dispersants for Combating Oil Pollution at Sea in the Mediterranean Region, Antalya, 15 October 1993” when considering dispersant in the presentation on Strategy, or “Principles and Guidelines concerning the sending, receiving and returning of equipment in case of international assistance operation” when considering the presentation on Resources and Mutual Assistance),
- ✓ Introduce in the presentations the results of REMPEC’s and MOIG’s assessment, the “Group Discussion Session”, the “National Consultation Session” and “ Action Plan”.

Consultants:

- ✓ Review the Country profiles and identify issues to be clarified when required,
- ✓ Discuss directly with the country representative to examine any reported or missing information in the country profile which would require clarification,
- ✓ Lead the discussion during the National Consultancy and take note of the interview,
- ✓ Provide conclusions and recommendations on the main issues/concerned highlighted during the session for their consideration in the last session of the day.

Facilitators:

- ✓ Lead the discussions during the “Group Discussion” session,
- ✓ take note of the main conclusions/recommendations on a power point presentation for their consideration in the last session of the day.

III. 4. Profiles of Participants

Contracting Parties were invited to nominate, in consultation with the relevant national competent authorities, two (2) government representatives. Considering that the participants would be requested to respond to some questions related to their national system and taking into account the nature of the Workshop focused on government and industry cooperation, the following profiles were requested:

- ✓ A representative of the national competent authority in charge of preparedness and response to marine pollution (OPRC Focal Point), and
- ✓ A representative of the national competent authority (e.g. Ministry in charge of Energy/Resources) in charge of following and managing oil industry activities in the country.

From the industry point of view, MOIG and IPIECA invited their respective members to participate in the Workshop by making available a representative of their facilities operating in the Mediterranean region.

IV. ORGANIZATION OF THE SEMINAR

Following the presentations as referred above, the participants were separated for the group discussions, during four (4) hours, as follows:

Group	Countries	Facilitators
Group A	Algeria, France, Italy, Lebanon, Monaco, Morocco, Spain and Tunisia.	A. Lamy
Group B	Albania, Croatia, EC, Israel, Malta, Montenegro, Slovenia and Turkey.	R. Schriel
Group C	Bosnia and Herzegovina, Cyprus, Egypt, Greece, Libya, and Syria	B. Lerch

Table 1: Group Discussions

Governments and oil industry representatives joined, for thirty (30) minutes, the National Consultation Panel composed of a consultants and representative from REMPEC and MOIG as indicated in the table 2 below.

Group	Consultant	REMPEC	MOIG
Group A	J.Y. Huet	F. Hebert	R. Dhaoui
Group B	D. Domovic	M. Tralan	
Group C	P. De Susanne	G. Gonzalez	R. Byrnes

Table 2: National Consultation Panel

The national consultations were run simultaneously with the Group Discussions as follows:

Time	Post A	Post B	Post C
09.00 – 09.30	Algeria	Albania	Bosnia and Herzegovina
09.35 – 10.05	France	Croatia	Cyprus
10.10 – 10.40	Italy	Israel	Egypt
10.45 – 11.15	Lebanon	Malta	Greece
11.20 – 11.50	Monaco	Montenegro	Libya
11.55 – 12.25	Morocco	Slovenia	Spain
12.30 – 13.00	Tunisia	Turkey	Syria

Table 3: National Consultation time table

IV.1. Opening of the Seminar

The Director of REMPEC, Mr. Frederic Hebert, the Director of MOIG, Mr. Ridha Dhaoui, the Executive Secretary of IPIECA, Mr. Richard Sykes and Mr. Stefan Micallef, Deputy Director, Marine Environment Division, IMO (IMO speech reproduced in **Annex 7**) opened the workshop at 08.30 am, on Monday 11 May 2009.

IV. 2. The Global Initiative

In order to set the set the context of the government and industry regional cooperation within the global framework approach, Mr. Micallef and Mr. Lerch, Chair of the IPIECA Oil Spill Working Group introduced the Global Initiative, a joint initiative between IMO and IPIECA established since 1996 to:

- ✓ Assist countries in developing a national structure for dealing with oil spills through the mobilization of external assistance and industry support at national & regional levels
- ✓ Encourage and assist countries in ratifying and implementing the OPRC Convention and other conventions related to liability and compensation

It was particularly emphasized, that *“there was not one model for all regions but a tailored solution can be developed, based on the circumstances, the existing regional organisations, and the possibility to draw on external resources”*.

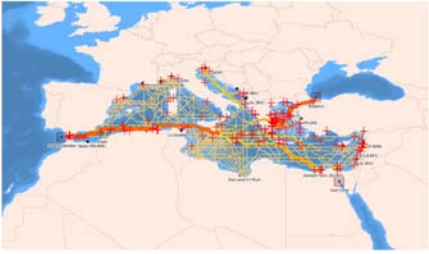

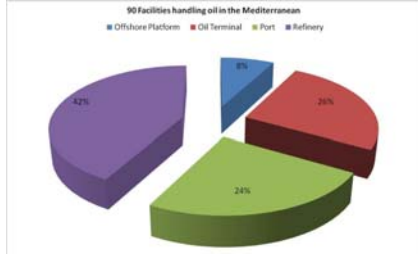

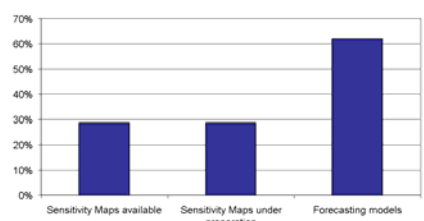

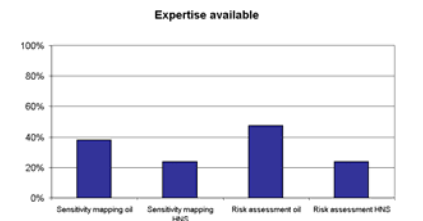

V. WORKSHOP'S FINDINGS

The following sheets summarize the findings by topics based on REMPEC's and MOIG's Assessment and on the outcome of the Group Discussions and National Consultation sessions:

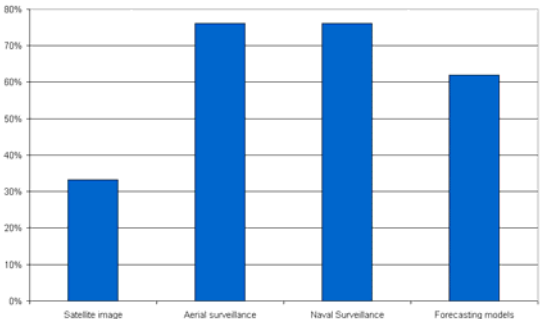

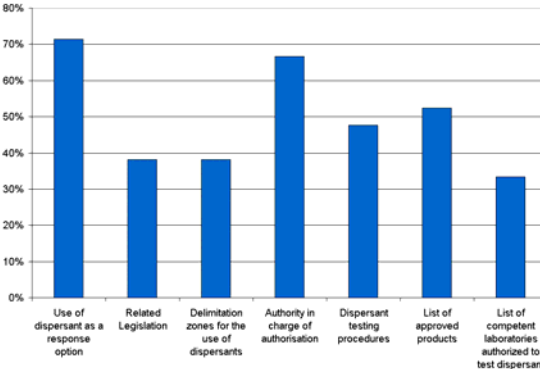

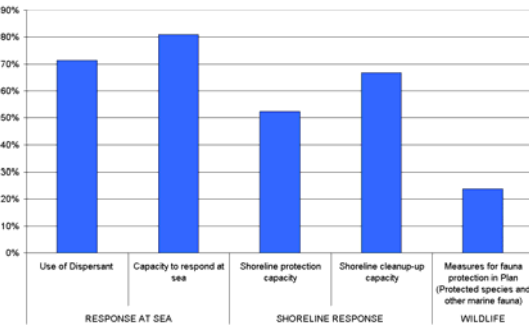

V.1. Contingency Planning

REMPEC/MOIG Assessment																																							
<table border="1"> <caption>Bar Chart Data: NCP Status</caption> <thead> <tr> <th>Category</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>NCP adopted</td> <td>~62%</td> </tr> <tr> <td>Relevant national legislation adopting the plan</td> <td>~58%</td> </tr> <tr> <td>Authority in charge of the plan maintenance</td> <td>~68%</td> </tr> <tr> <td>Authority in charge of implementing the plan</td> <td>~52%</td> </tr> </tbody> </table>	Category	Percentage	NCP adopted	~62%	Relevant national legislation adopting the plan	~58%	Authority in charge of the plan maintenance	~68%	Authority in charge of implementing the plan	~52%	<table border="1"> <caption>Bar Chart Data: NCP Status</caption> <thead> <tr> <th>Category</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>NCP adopted</td> <td>~62%</td> </tr> <tr> <td>NCP drafted/under preparation</td> <td>~25%</td> </tr> <tr> <td>No NCP</td> <td>~15%</td> </tr> <tr> <td>Contingency plan tested</td> <td>~58%</td> </tr> </tbody> </table>	Category	Percentage	NCP adopted	~62%	NCP drafted/under preparation	~25%	No NCP	~15%	Contingency plan tested	~58%	<p>Legend: ■ NCP adopted ■ NCP drafted/under preparation ■ NCP not adopted ● REMPEC Assistance</p>	<table border="1"> <caption>Bar Chart Data: Sites at Risk</caption> <thead> <tr> <th>Category</th> <th>% against total number of sites at risk in the need</th> </tr> </thead> <tbody> <tr> <td>1. Group Discussion	National Consultation																																		
<p>The Groups recognised:</p> <ul style="list-style-type: none"> • Need of support to run more exercises • Difficulty in communicating between government and industry networks • Need of sharing lessons learnt from exercises by disseminating the exercises report through REMPEC, • Need to increase the number of joint industry and government trainings and exercises • Best practice: Volunteers identified and trained in advance 	<ul style="list-style-type: none"> • Industry usually have a program of exercises and training in place • These programs are not always communicated to the government • The frequency of training and exercises by government is lower than for the industry 																																		

VI. ACTION PLAN

Governments and industry filled in at national the self evaluation form following the 10 ITOPF's self evaluation question as follows:

1. Has there been a realistic assessment of the nature and size of the possible threat, and of the resources most at risk, bearing in mind the portable movement of any oil spill?
2. Have priorities for protection been agreed, taking into account the viability of the various protection and clean-up options?
3. Has the strategy for protecting and cleaning the various areas been agreed and clearly explained?
4. Have temporary storage site and final disposal routes for collected oil and debris been identified?
5. Has the necessary organisation been outlined and the responsibilities of all those involved been clearly stated – will all who have a task to perform be aware of what is expected of them?
6. Have the arrangements for ensuring effective communication between shore, sea and air been described?
7. Are the levels of equipment, materials and manpower sufficient to deal with the anticipated size of spill? If not, have back resources been identified and, where necessary, have mechanisms for obtaining their release and entry to the country been established?
8. Are the alerting and initial evaluation procedures fully explained as well as arrangements for continual review of the progress and effectiveness of the clean-up operation?
9. Is the plan compatible with plans for adjacent areas and other activities?
10. Have all aspects of the plan been tested and nothing significant found lacking?

Government and industry representatives replied to the self evaluation questions separately from their respective point of view but in the same form (see REMPEC/MOIG/WG.1/4). The figures in purple correspond to the percentage of positive replies received from 19 out of 21 Mediterranean Coastal States. The reference taken for the graph (100%) correspond to 19 countries positive replies. On the basis of the 19 countries, the figures in yellow correspond to the percentage of positive response received from the industry representatives. The participation of the industry representatives in 6 countries session, about 30% of the 19 countries, explain the relatively low level of positive replies received from the industry.

The outcome of the Action Plan session is reported in figure 5.

Figure 5: Contingency Plan Self-evaluation results

According to the results, by order of priority the following topic need to be further improved:

1. Further testing of the plans to identify gaps and areas of improvements (42% of positive replies),
2. Need to ensure that the levels of equipment, materials and manpower is sufficient in country or through back resources by establishing mechanisms for obtaining their release and entry to the country (52% of positive replies),
3. Ensure that the plan is compatible with plans for adjacent areas and other activities (63% of positive replies),
4. Identify temporary storage site and final disposal routes for collected oil and debris **and** ensure that the alerting and initial evaluation procedures is fully explained as well as arrangements for continual review of the progress and effectiveness of the clean-up operation (68% of positive replies).

About 27 % of the countries who replied need also:

5. to agree and clearly explain the strategy for protecting and cleaning the various areas,
6. to clearly state the necessary organisation outlined and the responsibilities of all those involved, and
7. to describe the arrangements for ensuring effective communication between shore, sea and air

Finally, approximately 20% of the Mediterranean coastal States should:

8. Assess, bearing in mind the movement of any oil spill, the nature and size of the possible threat, and of the resources most at risk and,
9. Agree on priorities for protection, taking into account the viability of the various protection and clean-up options.

From an industry point of view the figure shows a relatively low level of participation of the industry. According to the MOIG study the 90 oil handling facilities were distributed in 15 Mediterranean countries, while industry was represented only for 6 countries. **The industry level of participation,**

taking into account the above mentioned geographical distribution, emphasises the need of further involving the oil industry operating in the 15 countries identified to ensure cooperation at national level between government and industry through out the Mediterranean region. The participation of the oil industry is essential for the implementation of a joint industry-government cooperation programme. It should be also noted that some oil industry were represented by a corporate company representative who did not had all the elements to answer to the questions which were focused on in-country facilities. **This highlights the need of involving oil industry representatives present in the countries that are more aware of the situation in their facilities.**

In this respect, the workshop recommended to strengthen the industry network and its interaction with government network.

In addition to the self evaluation, the government representatives together with the oil industry operating in the respective countries clearly stated in writing the following steps to ensure better level of preparedness for and response to marine pollution in their country and in collaboration with the industry. This valuable information will be considered by REMPEC and MOIG with the rest of the data gathered prior and during this event to develop a joint programme of activities to assist countries jointly with the industry to achieve the goals expressed in the "Action Plan" session. This information will also serve to build the activities of REMPEC and MOIG on individual basis.

VI. CONCLUSIONS AND RECOMMENDATIONS

The representatives of the Contracting Parties to the Barcelona Convention and the representatives of the Oil Industry operating in the Mediterranean region adopted the following recommendations:

- to endorse the need of more REMPEC and industry support and joint activities,
- to strengthen the industry network and its interaction with government network,
- to organize on a more regular basis industry and government joint trainings and exercises,
- to organize a joint industry/government Regional Workshop on risk assessment aimed at defining a joint realistic Mediterranean Risk Assessment,
- to develop Standard National Contingency Planning Template with same structure (it was recognized that the current Guidelines were not sufficient),
- to review the Mediterranean Dispersant guidelines with particular emphasise on the decision making process,
- to support the development of waste management plans,
- to centralize existing sensitivity maps on a Geographical Information System hosted by REMPEC,
- to access to reliable and common forecasting models,
- to focus efforts on operational and administrative arrangements to ensure a smooth entry, and exit of regional and international assistance,
- to increase technical assistance to MOIG,
- to improve cooperation on Aerial surveillance, and
- to get better understanding of EMSA's role in particular its support to non EU countries.

Conclusions and recommendations resulting from these discussions will serve as corner stone for the preparation of REMPEC/MOIG short, medium and long term programme addressing the gaps identified with a view to increasing in a reckonable manner the preparedness and response capacity level and the cooperation in the Mediterranean region. The programme will be prepared by REMPEC and MOIG in consultation with IMO and IPIECA and its implementation will start in 2010.

NATIONAL REGULATIONS AND RESPONSE STRATEGY

This section contains information on contingency plans and other means of preventing and combating pollution incidents (article 4). **(Tick and complete as appropriate)**

■ NATIONAL CONTINGENCY PLAN:

	STATUS/STATUS		
<input type="checkbox"/>	Contingency Plan Approved	Approval date: Last update date:	
<input type="checkbox"/>	Contingency Plan drafted	Draft date:	
<input type="checkbox"/>	Contingency Plan under preparation	Expected date :	
<input type="checkbox"/>	Relevant national legislation adopting the plan	Law, decret,etc..:	
<input type="checkbox"/>		Communication exercise	Table Top exercise
<input type="checkbox"/>	Contingency plan tested	<input type="checkbox"/> : 1 every ____	<input type="checkbox"/> : 1 every ____
<input type="checkbox"/>	Authority in charge of the plan maintenance	Full scale exercise: <input type="checkbox"/> : 1 every ____	
<input type="checkbox"/>	Authorities in charge of implementing the plan		
<input type="checkbox"/>	Other comments		

■ RESPONSE STRATEGY

Please provide brief details of your country's spill response strategy and approach toward the below mentioned options. Please tick the corresponding boxes if applicable and provide further details when available. This section aims at providing an overview of the response strategy without entering into details and complete the information requested in the section 4.

MONITORING AND EVALUATION			
	Yes	No	Specify – Annex
<i>What types of information can be made available for monitoring?</i>			
<i>Satellite image</i>	<input type="checkbox"/>	<input type="checkbox"/>	
<i>Aerial surveillance</i>	<input type="checkbox"/>	<input type="checkbox"/>	
<i>Naval Surveillance</i>	<input type="checkbox"/>	<input type="checkbox"/>	
<i>Forecasting models</i>	<input type="checkbox"/>	<input type="checkbox"/>	

RESPONSE AT SEA			
	Yes	No	Specify – Annex
Are you in a position to respond at sea?	<input type="checkbox"/>	<input type="checkbox"/>	
USE OF DISPERSANT			
	Yes	No	Specify – Annex
Do you consider in your strategy the use of dispersant as a response option?	<input type="checkbox"/>	<input type="checkbox"/>	
Related Legislation:	<input type="checkbox"/>	<input type="checkbox"/>	
Delimitation zones for the use of dispersants	<input type="checkbox"/>	<input type="checkbox"/>	
Authority in charge of authorisation	<input type="checkbox"/>	<input type="checkbox"/>	
Dispersant testing procedures	<input type="checkbox"/>	<input type="checkbox"/>	
List of approved products	<input type="checkbox"/>	<input type="checkbox"/>	
List of competent laboratories authorized to test dispersants on behalf of competent national authorities	<input type="checkbox"/>	<input type="checkbox"/>	
CONTAINMENT AND RECOVERY			
	Yes	No	Specify – Annex
Are you in a position to carry out containment and recovery operations?	<input type="checkbox"/>	<input type="checkbox"/>	Detail in section 5
IN SITU BURNING			
	Yes	No	Specify – Annex
Are you in a position to carry out in situ burning operations?	<input type="checkbox"/>	<input type="checkbox"/>	Detail in section 5
SHORELINE PROTECTION AND CLEANUP			
	Yes	No	Specify – Annex
Are you in a position to carry out shoreline protection operations?	<input type="checkbox"/>	<input type="checkbox"/>	Detail in section 5
Are you in a position to carry out shoreline cleanup operations?	<input type="checkbox"/>	<input type="checkbox"/>	
Is the shoreline character considered or described in your contingency plan?	<input type="checkbox"/>	<input type="checkbox"/>	
VOLUNTEERS MANAGEMENT			
	Yes	No	Specify – Annex
Have you considered the management of volunteers in you contingency plan	<input type="checkbox"/>	<input type="checkbox"/>	
WASTE MANAGEMENT			
	Yes	No	Specify – Annex
Do you have a national policy regarding oily waste?	<input type="checkbox"/>	<input type="checkbox"/>	
Is there any treatment/disposal facilities/solutions available?	<input type="checkbox"/>	<input type="checkbox"/>	

COMMUNICATION			
Have you considered a communication plan, in your contingency plan for:			
	Yes	No	Specify – Annex
Operation activities	<input type="checkbox"/>	<input type="checkbox"/>	
Government/Industry relation	<input type="checkbox"/>	<input type="checkbox"/>	
Public relation	<input type="checkbox"/>	<input type="checkbox"/>	
Media relation	<input type="checkbox"/>	<input type="checkbox"/>	

CLAIMS			
	Yes	No	Specify – Annex
Is there any legal basis at national level for claims?	<input type="checkbox"/>	<input type="checkbox"/>	
Is the issue of claims included in your contingency plan	<input type="checkbox"/>	<input type="checkbox"/>	
Is there any national structure to deal with claims?	<input type="checkbox"/>	<input type="checkbox"/>	

EXPERTS			
	Yes	No	Specify – Annex
Would you consider integrating international experts in the coordination body	<input type="checkbox"/>	<input type="checkbox"/>	
Have you plan this integration	<input type="checkbox"/>	<input type="checkbox"/>	
Is the role of international experts clearly defined in your plan	<input type="checkbox"/>	<input type="checkbox"/>	

SECTION 3

REGIONAL AND INTERNATIONAL AGREEMENT/PROTOCOLS/CONVENTIONS

■ REGIONAL CONVENTIONS:

International Legal Instrument	Ratification			Implementation Transposition of the international instrument in the national legislation		
	Yes	No	Date	Yes	No	Specify (Law, decree, etc..)
BARCELONA CONVENTION	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>	
EMERGENCY PROTOCOL, 1976	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>	
PREVENTION AND EMERGENCY PROTOCOL, 2002	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>	

■ SUBREGIONAL AGREEMENTS

	STATUS	DATE
<input type="checkbox"/>	Plan Approved	Date of signature: Ratification date
<input type="checkbox"/>	Relevant national legislation adopting the plan	Law, decree, etc.:

SECTION 5

EXPERTISE AND EQUIPEMENT AVAILABLE AND MEASURES IN PLACE FOR TRANSBOUNDARY EXCHANGE

This section contains information on the expertise and equipment available in the country that the competent national authorities can put, under certain conditions, at the disposal of another Contracting Party to the Prevention and Emergency Protocol to the Barcelona Convention, when so requested in case of emergency (article 12.1). This section also contains information on the expertise and equipment available in the country for a national response.

■ **Information concerning the State with expertise and equipment available.**

■ **ADDRESSES AND OPERATIONAL ARRANGEMENTS/**

TO WHOM THE REQUEST HAS TO BE ADDRESSED (please state the department and/or the position of the person to be contacted, not the name of the specific person)	
Full name of the institution	
Department or position	
Address (number, street, city)	
Telephone (24 hours a day)	
Telefax	
E-mail	
Working hours	
Financial conditions for expert services	
Restrictions (visa, etc.) concerning travel to any Mediterranean country? If yes, please indicate which countries	
Financial and other conditions (transportation, etc.) for making the equipment or product available to a requesting party	
Location of equipment and products are stored and nearest port or airport (city/port, city/airport)	

If your country was to request assistance (expertise/equipment).

Documents required for the entry of international experts in your territory	
In case of emergency, is a visa required or can it be provided at the airport?	
What is the position regarding customs duties for equipment arriving for assistance (both entry and exit)?	
Contact point for custom procedure (please state the department and/or the position of the person to be contacted, not the name of the specific person)	
Full name of the institution	
Department or position	
Address (number, street, city)	
Telephone (24 hours a day)	
Telefax	
E-mail	
Working hours	

■ EXPERTISE AVAILABLE (tick as appropriate)

A) PREPARATORY ACTIVITIES	Expert and training Centres (please provide contact details)
Sensitivity mapping <input type="checkbox"/> oil <input type="checkbox"/> chemicals	
Risk assessment <input type="checkbox"/> oil <input type="checkbox"/> chemicals	
Contingency planning <input type="checkbox"/> oil <input type="checkbox"/> chemicals	
Training of personnel <input type="checkbox"/> oil <input type="checkbox"/> chemicals	
B) RESPONSE TO ACCIDENTS – OPERATIONAL	Expert and training Centres (please provide contact details)
Firefighting	<input type="checkbox"/>
Response to oil spills at sea	<input type="checkbox"/>
Response to oil on shore	<input type="checkbox"/>
Response to spills/releases of HNS	<input type="checkbox"/>
Recovery of lost Packages of HNS	<input type="checkbox"/>
Aerial Surveillance	<input type="checkbox"/>
Satellite images	<input type="checkbox"/>

Overall emergency management	<input type="checkbox"/>	
Shoreline decontamination	<input type="checkbox"/>	
Modelling and forecasting	<input type="checkbox"/>	
Impact – Wildlife and birds	<input type="checkbox"/>	
Impact – Fisheries/fish farming	<input type="checkbox"/>	
Accident site restoration	<input type="checkbox"/> oil	<input type="checkbox"/> chemicals

C) RESEARCH AND DEVELOPMENT

Please indicate any research activity carried out or in process in the field of preparedness and response to marine pollution

Subject	Contacts	Description

■ RESOURCES (tick as appropriate and/or indicate the quantity accordingly)

A) PERSONNEL SUPPORT

	Available for national use	At disposal of Contracting Parties
Protective clothing	<input type="checkbox"/>	<input type="checkbox"/>
Respiratory system	<input type="checkbox"/>	<input type="checkbox"/>
Specialized diving equipment	<input type="checkbox"/>	<input type="checkbox"/>

B) PRODUCTS (tick if available)

	Available for national use		At disposal of Contracting Parties	
	Oil	Chemicals	Oil	Chemicals
Dispersants	<input type="checkbox"/>		<input type="checkbox"/>	
Bioremediation agents	<input type="checkbox"/>		<input type="checkbox"/>	
Sorbents	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Emulsion breaker	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(Rock) cleaning agents				
Other chemical agents				

C) EQUIPMENT / EQUIPEMENTS

	Available for national use		At disposal of Contracting Parties	
	<input type="checkbox"/>	Quantity	<input type="checkbox"/>	Quantity
Anti-pollution vessel	<input type="checkbox"/>	Quantity	<input type="checkbox"/>	Quantity

INTRODUCTION

The history of oil spill preparedness and prevention efforts has shown that immediately after an incident there is increased interest and attention. However, this is shortly followed by declining resources as attention shifts to other problems. Authorities, companies and individuals responsible for the management of preparedness and response capabilities do hold a certain degree of accountability when there is a failure in preparedness through the actual response to incidents.

After the success that had the MOIG "Integration of Emergency Plans" Workshop we held in Malta during the 8th Focal Points Meeting, the main recommendation raised to continue the work of cooperation between REMPEC and MOIG to organize a joint Government-Industry Workshop on Preparedness and Response to marine pollution to exchange information on the status of Preparedness and Response in the Mediterranean Sea from a Government and Industry perspective.

In this field, MOIG has prepared the following Questionnaire to assess the situation in term of Contingency Planning, Management, Equipment and cooperation with Government. REMPEC has carried out a similar assessment for Governments.

The Main objective of these two assessments is to enable REMPEC and MOIG to converge industry and Government assessments to identify common future activities for a better regional cooperation and level of preparedness and response between all stakeholders in the Region.

The fact that oil and gas Industry through the MOIG are the main drivers in the formation of this self assessment clearly demonstrates a willingness to improve the preparedness and response options available to them throughout the Mediterranean region.

Industry both at the national and international level participates in regional initiatives at various levels with regards to environmental protection; furthermore Industry is conscious as regards image and public opinion.

The main focus of the self assessment has been that of regional capability, with the understanding that the regional capability is fully reliant on the national capability of countries throughout the region including the capability of petroleum and maritime sector.

The data received shall be centralized and used for future planning and incident response, therefore in this regard it is imperative that the data provided is as accurate as possible.

The following assessment is based on the requirements of the Barcelona Convention "Prevention and Emergency Protocol" and the International Convention on Oil Pollution Preparedness, Response and Co-operation, OPRC 1990 and its article 6..

Each participating company and/or organization shall complete sections 1 to 4 and the relevant annexes. The completed documents shall be sent to the MOIG for inclusion on the centralized database.

SECTION 1 - OIL SPILL CONTINGENCY PLAN:

OIL SPILL CONTINGENCY PLAN STATUS					
1.1	Do you have an Oil Spill Contingency Plan available	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to Question 1.6		Go to next Question	
1.2	Do you have a draft of an Oil Spill Contingency Plan	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to next Question		Go to Question 1.4	
1.3	What is the draft date			Go to Question 1.6	
1.4	Do you have an Oil Spill Contingency Plan Under Preparation	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to next Question		Go to Section 2	
1.5	When is the Oil Spill Contingency Plan Expected				
1.6	Is the Oil Spill Contingency Plan based on a risk assessment	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to next Question		Go to Question 1.8	
1.7	What are the Spill scenarios the plan is based on :- (Please indicate the volumes in tons)	Operational Spill			
		Worst Case Spill			
1.8	Is the Oil Spill Oil Contingency Plan approved	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to next Question		Go to Question 1.10	
1.9	Details of Approval	Approved by			
		Approved Date			
1.10	Is the Oil Spill Oil Contingency Plan based on tiered response	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
1.11	Has the Oil Spill Contingency Plan ever been used	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
1.12	Details of Contingency Plan test	Last Test			
		Next Test			
1.13	Department / Person in Charge to maintain the Contingency Plan				
1.14	Dept / Person in Charge to implement the Contingency Plan				
1.15	What Area (s) is covered by the Plan (Please attach separate sheet if required)				
1.16	In terms of Capability Management what are the expected time frames of actual response utilizing the following resources - Days/Hrs	Local			
		National			
		International			
1.17	Does the Plan contain checklists? (Please specify)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
1.18	Does the plan contain oil spill modeling information	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		Go to next Question		Go to section 2	
1.19	Is the model outcome addressed in the Contingency plan	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
1.20	What is the language of the plan (Arabic, English, etc)				

SECTION 2 – RESPONSE AND PROTECTION:

2.1 AT SEA OIL SPILL RESPONSE					
2.1.1	Do you have capability for at sea response	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 2.2.1</i>	
2.1.2	What is the capacity of at sea oil spill response	Tons			
2.1.3	How is the capacity determined	Skimmers			
		Storage			
		Oil Booms			
		Other			
2.1.4	Is the At Sea Capacity maintained all year round	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to Question 2.1.6</i>		<i>Go to next Question</i>	
2.1.5	What is the period that you maintain an offshore oil spill response capability	1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter
		<i>Other (Please Specify)</i>			
2.1.6	Do you have an Emergency Towing Vessels available	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 2.2.1</i>	
2.1.7	How many Emergency towing vessels are available	Number		Bollard Pull	

2.2 SHORELINE RESPONSE					
2.2.1	Do you have Capacity for shoreline protection operations	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 2.2.3</i>	
2.2.2	How is the shoreline protection capacity determined	Skimmers			
		Storage			
		Oil Booms			
		Other			
2.2.3	Do you have Capacity for shoreline response operations	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 2.3.1</i>	
2.2.4	How is the shoreline response capacity determined	Skimmers			
		Storage			
		Oil Booms			
		Other			

2.3 RESPONSE OPTIONS					
2.3.1	Do you have Capacity for chemical spill response (HNS)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.2	Do you have Capacity for wildlife handling	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.3	Do you have Capacity to protect fisheries/fish farming	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.4	Do you have Capacity to protect water intakes	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.5	Do you have Pre determined response strategies	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.6	Is there Designated Sacrificial beaches	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

2.3.7	Do you have Capacity to protect sensitive areas	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.8	Is there Designated temporary staging areas	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.3.9	Do you have Command Posts (Fixed/Mobile)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

2.4 DISPERSANT					
2.4.1	Do you consider the use of dispersant a response option	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.4.2	How much dispersant do you have	Tons		bbbls	
2.4.3	What is the method of dispersant application	Ariel			
		Ship			
		Other			
2.4.4	Is the use of dispersant and dispersant type pre approved by authorities	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.4.5	Is the Dispersant response option based on a time factor for the various oil types	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.4.6	Is Further approval required when dispersant is used in a response	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
2.4.7	Do you have a dispersant management plan	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

SECTION 3 – MANAGEMENT:

3.1 MONITORING AND EVALUATION:		
What types of monitoring and evaluation equipment do you have available. <i>(Please Specify)</i>		
3.1.1	Naval Surveillance <i>(Support vessels, please indicate number and type)</i>	
3.1.2	Aerial (Helicopter, Fixed wing)	
3.1.3	Satellite	
3.1.4	Oil Spill Modeling	
3.1.5	Fingerprinting	

3.2 RESPONSE TEAM:					
3.2.1	Do you have a Emergency Response Team available	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.2	Do you have a Emergency Response Team Organization Chart	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.3	Do you have a Emergency Response Team Job Description	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.4	Do you have a Emergency Response Team roster	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.5	Do you have a Management Plan for external personnel including Casual labor	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.6	Do you have a System of Induction for Emergency Response Team members	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.2.7	Do you have a System of Evaluation for Emergency Response Team member	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

3.3 WASTE					
3.3.1	Do you have a Waste management plan for oily waste	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.3.2	Is your Waste management plan approved by authorities	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.3.3	Do you have an Waste storage facilities	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 3.2.7</i>	
3.3.4	Do you have Capacity for liquid storage	Tons		M ³	
3.3.5	Do you have Capacity for solid storage	Tons		M ³	
3.3.6	Do you have Waste treatment facilities	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.3.7	Is there a designated Waste Transportation system	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Question 3.3.1</i>	
3.3.8	What is the capacity for Waste transportation on land	Tons		M ³	
3.3.9	What is the capacity for Waste transportation at Sea	Tons		M ³	

3.4 COMMUNICATION					
3.4.1	Do you have a Communications plan	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.4.2	Does you have a plan for Public Relations	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.4.3	Does you have a plan for Media Relations	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.4.4	Is there a Common Language used in emergencies (<i>Please specify, Arabic, English, French etc.</i>)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

3.5 FINANCE					
3.5.1	Has Financial limits for decision makers been pre determined	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.5.2	Do you have a Claims and Compensation Mechanism	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.5.3	Is there a Finance Management Plan for Emergency Situations	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

3.6 EXTERNAL SUPPORT: Regional / International					
3.6.1	Do you have a policy for the use of International Experts	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.2	Are you a Member of any International oil spill response organization	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.3	Are you a Member of any regional oil spill response organization	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.4	Are all visa and entry restrictions in place (Emergency Protocols)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.5	Are the relevant infrastructure details known and up to date, (Airports, Hotels, Ports, Roads, Rail, Security etc)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.6	Are there any restrictions regarding bringing external equipment and or chemicals	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
3.6.7	Do you need authority approval to activate your national/regional or international response agreement	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>

SECTION 4 – PREPAREDNESS:

4.1 EXPOSURE					
Details Oil / Hydrocarbon					
		Type / Grade			Quantity
4.1.1	Production				
4.1.2	Consumption				
4.1.3	Export				
4.1.4	Import				
4.1.5	Offshore Production	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
4.1.6	Offshore Production Platforms / Units	Number			
4.1.7	Mobile offshore Drilling Rigs / Units	Number			
4.1.8	Floating Storage Units	Number			
4.1.9	Other offshore Units (<i>Please specify</i>)	Number			

4.2 MARINE TRAFFIC (Ports, Terminals and Canal only)		
4.2.1	Number of Loaded oil tankers arriving / departing	
4.2.2	Average size and type of Oil Tankers (double/single hull)	
4.2.3	Number of Loaded chemical tankers arriving / departing	
4.2.4	Average size and type of Chemical Tankers (double/single hull)	
4.2.5	Number of Loaded vessels other than oil or chemical tankers arriving / departing	
4.2.6	Average size and type of vessels other than Oil or Chemical Tankers	

4.3 OFFSHORE SUPPORT VESSELS (Offshore Operators, and Offshore Support Service Companies only)							
4.3.1	Offshore Platform Supply Vessels	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>	Number	
4.3.2	Anchor Handling Tugs	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>	Number	
4.3.3	Diving Support Vessels	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>	Number	
4.3.4	Survey Vessels	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>	Number	
4.3.5	Other (<i>Please Specify</i>)	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>	Number	

4.4 FOUNDATION DATA					
4.4.1	Do you Record all accidents <i>(even if no pollution)</i>	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
4.4.2	Do you record a near miss <i>(Possible accident)</i>	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
4.4.3	How many accidents has there been in the last 5 years				
4.4.4	How Many accidents have resulted in a spill in the last 5 years				
4.4.5	How many near miss situations have been recorded in the last 5 years				
4.4.6	How many near miss situations involved oil or chemical tankers in the last 5 years				

4.5 HISTORICAL SPILL DATA			
Please provide the date, location, type of pollutant and quantity of significant spills that have occurred at opr near any of your facilities, including the marine vessels serving any of your facilities.			
Date	Location	Type of Pollutant	Quantity

4.6 SENSITIVE AREAS				
Details	Yes	No	Specify / Attach Details	
4.6.1	Sensitive Maps Available	<input type="checkbox"/>	<input type="checkbox"/>	
4.6.2	Sensitive Maps under preparation	<input type="checkbox"/>	<input type="checkbox"/>	
4.6.3	Coastline (KM) covered	<input type="checkbox"/>	<input type="checkbox"/>	
4.6.4	Type of Coastline	<input type="checkbox"/>	<input type="checkbox"/>	
4.6.5	Other Relevant Information	<input type="checkbox"/>	<input type="checkbox"/>	

4.7 TRAINING				
Training Course	Yes	No	Date Last Course	Please Specify the training course
4.7.1	First Responder	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.2	On Scene Commander	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.3	Decision Maker	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.4	Claims and Compensation	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.5	Sensitivity Mapping	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.6	Contingency Planning	<input type="checkbox"/>	<input type="checkbox"/>	
4.7.7	Computer Modeling	<input type="checkbox"/>	<input type="checkbox"/>	

4.7.8	Risk Assessment	<input type="checkbox"/>	<input type="checkbox"/>		
4.7.9	Other	<input type="checkbox"/>	<input type="checkbox"/>		

4.8 EXERCISES AND DRILLS

A drill is a test of a portion of the emergency response system (for example, a communication test, or a desktop exercise to test emergency procedures and emergency teams responsible for an area selected for that particular drill). An "exercise" typically tests many facets of the emergency response system and often involves close coordination between various stakeholders.

Preparedness tests		Yes	No	Date Last Test	Comments
4.8.1	Oil Spill Drills (Desktop)	<input type="checkbox"/>	<input type="checkbox"/>		
4.8.2	Oil Spill Drill (Communication)	<input type="checkbox"/>	<input type="checkbox"/>		
4.8.3	Oil Spill exercise (Deployment)	<input type="checkbox"/>	<input type="checkbox"/>		

4.9 LEGAL FRAMEWORK

Dependant on the nature of your business and the owners, managers or partners of the business, your company shall follow a certain legal framework, in order to ascertain the legal framework your company operates within please answer the following.

		Yes	No	Please Specify
4.9.1	Environmental Legislation followed for the management of Hydrocarbon / Chemicals.	<input type="checkbox"/>	<input type="checkbox"/>	
4.9.2	Competent Authority you are responsible to for the management of Hydrocarbon / Chemicals.	<input type="checkbox"/>	<input type="checkbox"/>	
4.9.3	Oil Spill Contingency Plan, National, Oil Sector, Regional or area.	<input type="checkbox"/>	<input type="checkbox"/>	

ANNEX 1 – RESPONSE EQUIPMENT

A1	Do you have containment and recovery equipment available	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Go to next Question</i>		<i>Go to Annex 2</i>	
A2	Is the containment and recovery equipment available to others	Yes	<input type="checkbox"/>	No	<input type="checkbox"/>
		<i>Complete Colum 1</i>		<i>Complete Colum 1</i>	

Equipment Status		Colum 1			Colum 2		
No	Description	Available for Own use			Available to Others		
1	Emergency Response Vessel	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
2	Surveillance Aircraft	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
3	Ariel Dispersant Application	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
4	Cargo Transfer Pumps (Oil)	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
5	Hoses	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
6	Generators (Inert Gas)	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
7	Boom Offshore	<input type="checkbox"/>	Length (Meters)		<input type="checkbox"/>	Length (Meters)	
8	Boom Coastal	<input type="checkbox"/>	Length (Meters)		<input type="checkbox"/>	Length (Meters)	
9	Skimmer Barrier	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
10	Skimmer	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
11	Pumps	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
12	Vessel Mounted Spraying Systems	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
13	Portable Spraying System	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
14	Spraying Systems for Helicopters	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
15	Beach Cleaner	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
16	Pressure Washers	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
17	Vacuum Systems	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
18	Temporary Storage Tanks	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
19	Plastic Bags / Sheeting	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
20	Subsea location and Recover Device	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
21	Underwater Pumping systems	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
22	Meters and Samplers	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
23	Mobile Incident units	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	

24	Earth Moving equipment	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
25	Small Workboats	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
26	Trucks	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
27	Adsorbents rolls, pads and sheets	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	
28	Other	<input type="checkbox"/>	Quantity Number		<input type="checkbox"/>	Quantity Number	

ANNEX 2 – REQUESTING EXTERNAL ASSISTANCE

If your company / organization was to request assistance (Expertise and or Equipment)

A2.1 ASSISTANCE REQUEST				
A2.1.1	Are there any restrictions on the movement of equipment within the country, e.g. passes, permits, day and night travel?			
A2.1.2	Are there any restrictions on the movement of response teams, e.g. Passes, permits, day and night travel together with accommodation?			
A2.1.3	Documents required for the entry of international experts			
		Yes	No	Please Specify
A2.1.4	Do you have protocols in place for the movement of equipment in country	<input type="checkbox"/>	<input type="checkbox"/>	
A2.1.5	Do you have protocols in place for the movement of response teams in country	<input type="checkbox"/>	<input type="checkbox"/>	
A2.1.6	Can a Visa be obtained at the Airport (International)	<input type="checkbox"/>	<input type="checkbox"/>	
A2.1.7	Can equipment enter/exit free of customs duties (International)	<input type="checkbox"/>	<input type="checkbox"/>	
A2.1.8	Is there restriction to enter / exit dispersant (International)	<input type="checkbox"/>	<input type="checkbox"/>	

A2.2 CONTACTS (Emergency Protocol Management)	
A2.2.1	Please state the department / position of the person responsible to ensure emergency protocols are followed in Emergency situations (Not the name of the Person)
Full Name of the Company responsible	
Department or Position	
Address (Number, Street, City)	
Telephone (24 Hrs)	
Telefax	
E-Mail	
Working Hours	

A2.3 CONTACTS (External support)	
A2.2.2	Please state the department / position of the person responsible to request external support for emergency situations. (Not the name of the Person)
Full Name of the Company responsible	
Department or Position	
Address (Number, Street, City)	
Telephone (24 Hrs)	
Telefax	
E-Mail	
Working Hours	

A2.4 LEVEL OF ASSISTANCE REQUIRED							
An emergency can unveil all sorts of issues and therefore it is difficult to determine what type of assistance would be required, However in order to determine the reliance on external support be it in country or international we need to ascertain your company / organizations expectations on what would be required. As an expectation when not met in times of crisis can further complicate the unfolding emergency. Please indicate the most likely type of assistance your company would expect when faced with an emergency situation.							
A2.3.1	Firefighting	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.2	Response to Oil Spills at Sea	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.3	Response to Oil Spills on shore	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.4	Response to Spills of HNS	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.5	Ariel Surveillance	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.6	Satellite Images	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.7	Emergency Management	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.8	Shoreline Clean up (Decontamination)	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.9	Modeling and Forecasting	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.10	Impact – Wildlife and Birds	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.11	Impact – Fisheries/Fish farms	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A2.3.12	Claims and Compensation (Advise and Council)	Technical	<input type="checkbox"/>	Operational	<input type="checkbox"/>	Legal	<input type="checkbox"/>
A2.3.13	Legal (Advise and Council)	Local	<input type="checkbox"/>	National	<input type="checkbox"/>	International	<input type="checkbox"/>

ANNEX 3 – RENDERING ASSISTANCE

If your company / organization was requested for assistance (Expertise / Equipment)

A3.1 ASSISTANCE REQUEST				
A3.1.1	Are there any restrictions on the movement of your equipment within the country, e.g. passes, permits, day and night travel?			
A3.1.2	Are there any restrictions on the movement of your response teams, e.g. Passes, permits, day and night travel?			
A3.1.3	Are there any financial or insurance restrictions on the use of your resources, (Equipment and Personnel)			
		Yes	No	Please Specify
A3.1.4	Are there Protocols in place for the movement of your equipment in country	<input type="checkbox"/>	<input type="checkbox"/>	
A3.1.5	Are there Protocols in place for the movement of your response teams in country	<input type="checkbox"/>	<input type="checkbox"/>	
A3.1.6	Can your equipment exit/enter free of customs duties (International)	<input type="checkbox"/>	<input type="checkbox"/>	
A3.1.7	Is there restriction to exit/enter dispersant (International)	<input type="checkbox"/>	<input type="checkbox"/>	

A3.2 CONTACTS (Emergency Protocol Management)	
A3.2.1	Please state the department / position of the person responsible to ensure emergency protocols for the release of resources (equipment and Personnel) are followed in Emergency situations (Not the name of the Person)
Full Name of the Company responsible	
Department or Position	
Address (Number, Street, City)	
Telephone (24 Hrs)	
Telefax	
E-Mail	
Working Hours	

A3.3 CONTACTS - (Support Provision)	
A3.2.2	Please state the department / position of the person responsible to release resources (equipment and personnel) in support of emergency situations. (Not the name of the Person)
Full Name of the Company responsible	
Department or Position	
Address (Number, Street, City)	
Telephone (24 Hrs)	
Telefax	
E-Mail	
Working Hours	

A3.4 RENDERING ASSISTANCE							
An emergency can unveil all sorts of issues and therefore it is difficult to determine what type of assistance would be required, However in order to determine what reliance can be put on your support be it in country or international we need to ascertain the type and level of support that could be provided.							
A3.3.1	Firefighting	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.2	Response to Oil Spills at Sea	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.3	Response to Oil Spills on shore	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.4	Response to Spills of HNS	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.5	Ariel Surveillance	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.6	Satellite Images	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.7	Emergency Management	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.8	Shoreline Clean up (Decontamination)	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.9	Modeling and Forecasting	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.10	Impact – Wildlife and Birds	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.11	Impact – Fisheries/Fish farms	Equipment	<input type="checkbox"/>	Personnel	<input type="checkbox"/>	Expertise	<input type="checkbox"/>
A3.3.12	Claims and Compensation (Advise and Council)	Technical	<input type="checkbox"/>	Operational	<input type="checkbox"/>	Legal	<input type="checkbox"/>
A3.3.13	Legal (Advise and Council)	Local	<input type="checkbox"/>	National	<input type="checkbox"/>	International	<input type="checkbox"/>

ANNEX 4 - ASSISTANCE (prevention preparedness and response enhancement requirements)

Please indicate the order of priority your company / organization places on the need for further improvement/enhancement (if required)

	Specific Needs		
	Priority	Description	Specify / Details
A4.1.1		Environmental Impact Assessment	
A4.1.2		Integrated Impact Assessment	
A4.1.3		Contingency Plan	
A4.1.4		Containment and Recovery	
A4.1.5		Type / approval and Use of Dispersants	
A4.1.6		Shoreline Protection and Cleanup	
A4.1.7		Volunteers management	
A4.1.8		Communication	
A4.1.9		Waste Management	
A4.1.10		Claims and Compensation	
A4.1.11		Experts	
A4.1.12		Legislation (National)	
A4.1.13		Legislation (International)	
A4.1.14		Regional Agreements	
A4.1.15		Sub regional Agreements	
A4.1.16		Risk Assessment	
A4.1.17		Sensitivity Mapping	
A4.1.18		Training	
A4.1.19		Workshop	
A4.1.20		HNS	
A4.1.21		Any other need	
A4.1.22		Sustainable Development	
A4.1.23		Other (<i>Please specify</i>)	

ANNEX 5 – FUTURE CO-OPERATION

Emergency response is fully reliant on cooperation and in this regard we would value your input on the following

A5.1 TIERED RESPONSE							
A5.1.1	Tier 1 resources in Country (Local Resources)	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.1.2	Tier 2 resources in Country (National/Area Resources)	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.1.3	Tier 3 resources (International Resources)	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>

A5.2 SUPPORT ORGANIZATIONS							
A5.2.1	International oil companies support organizations	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.2.2	National Oil and Joint venture companies support organizations	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.2.3	Maritime sector support organization	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.2.4	National Support Organizations	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.2.5	Regional support organizations	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.2.6	International Support Organizations	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>

A5.3 SHARING SCHEMES – TO CASCADE RESOURCES IN TIMES OF EMERGENCY							
A5.3.1	International oil companies sharing scheme for resources in country	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.3.2	National Oil and Joint venture companies sharing scheme for resources in country	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.3.3	Maritime sector sharing scheme for resources in country	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.3.4	Regional sharing scheme to bring resources in country	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.3.5	International sharing scheme to bring resources in country	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>

A5.4 MAINTAINING PREPAREDNESS AND RESPONSE							
A5.4.1	Stakeholders participating in emergency planning	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.4.2	Local Drills (<i>Other than your own facilities</i>)	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.4.3	Area / National Exercises to cascade and integrate resources	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.4.4	International Exercises to cascade and integrate resources	Adequate	<input type="checkbox"/>	Insufficient	<input type="checkbox"/>	unknown	<input type="checkbox"/>

A5.5 FINANCE AND MANAGEMENT									
Maintaining an adequate level of preparedness and response is costly to any company / organization, Accident rates are decreasing, however inevitably they shall still occur, therefore there is a definite need to maintain a level of preparedness and response commiserate to the identified risk, one such way is sharing resources. In order to effectively ensure adequate resources there must be a budget available. Can you please indicate your company's views on the following?									
A5.5.1	Financial participation in an national response system.	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	Not at This Time	<input type="checkbox"/>	Own Resources are adequate	<input type="checkbox"/>
A5.5.2	Participate with regional oil spill response organizations	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	Not at This Time	<input type="checkbox"/>	Own Resources are adequate	<input type="checkbox"/>
A5.5.3	Participate with international oil spill response organizations	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	Not at This Time	<input type="checkbox"/>	Own Resources are adequate	<input type="checkbox"/>

A5.5 GOVERNMENT AND INDUSTRY COOPERATION							
A5.5.1	What level of communication/dialogue between Government and Oil Industry exists	High	<input type="checkbox"/>	Medium	<input type="checkbox"/>	absent	<input type="checkbox"/>
A5.5.2	Are Industry Oil Spill Contingency Plans in line with the National one	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.5.3	Are the Industry Emergency Plans co-ordinated with the National system established in accordance with art.6 of the OPRC and approved in accordance with procedures established by the Competent National Authority	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.5.4	Does Oil Companies communicate/exchange information regularly with other Oil Companies operating in the same Country	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.5.5	Is there any specific Agreement, Arrangement, Committee or Mechanism	High	<input type="checkbox"/>	Medium	<input type="checkbox"/>	absent	<input type="checkbox"/>
A5.5.6	Does Industry organize regularly joint exercise with other industry operating locally	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.5.7	Does Industry and Government organize joint exercise	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>
A5.5.8	If Government requires equipment or expertise would you be in a position to assist and under which condition	No	<input type="checkbox"/>	Yes	<input type="checkbox"/>	unknown	<input type="checkbox"/>

For further and detailed information to answer the Section A5.5 Question, please complete Hein after:

GLOSSARY

At Sea Response	The ability to mount a response within the at sea area at estimated time frame. Pre planning and resources are critical in determining the at sea response capability.
Dispersant management plan	A plan designed for the full management of dispersant. Buying approved certified types, Stock control, Pre-Use approval, Use Approval, Use, resupply and recertification.
Mobilization	The time it takes to get the resources assembled and prepared at the staging site.
Near shore	Means the area extending seaward 12 nautical miles from the line of demarcation.
Oil	Means petroleum in any form including crude oil, fuel oil, sludge, oil refuse and refined products.
Offshore Unit	Means any fixed or floating offshore installation or structure engaged in gas or oil exploration, exploitation or production activities, or loading or unloading of oil.
Oil Boom	Boom that is used to collect and hold oil on the surface of the water for recovery by skimmers or similar collection devices.
Oil Pollution Incident	Means an occurrence or series of occurrences having the same origin, which results or may result in a discharge of oil and which poses or may pose a threat to the marine environment, or to the coastline or related interests of one or more States, and which requires emergency action or other immediate response.
Oil Spill Modeling	A computer software predicting the movement of oil and scale of impact on resources, utilizing real time and operator input data to provide a valuable planning tool for preparedness and a powerful response tool for decision support when used in combination with in-field surveillance.
Own Resources	Equipment and personnel dedicated primarily to oil spill response, cleanup, and spill containment. Such equipment and personnel are not utilized for any other activity that would affect the response capability.
Protective boom	Boom used for deflecting/diverting or otherwise influencing oil on the water surface away from sensitive environments, often but not always toward containment sites.
Sea Port	Means those facilities which present a risk of an oil pollution incident and includes, inter alia, sea ports, oil terminals, pipelines and other oil handling facilities.
Ship	Means a vessel of any type whatsoever operating in the marine environment and includes hydrofoil boats, air-cushion vehicles, submersibles, and floating craft of any type.
Shoreline Protection	The capability to protect a certain area of coastline from the impact of an oil spill. The actual area that can be protected shall be applicable to pre planning and the resources available.
Shoreline Response	The ability to mount a response from the shoreline, deploying resources from designated areas. The actual response ability shall be determined by pre planning, available resources and the type of shoreline.
Skimmers	Devices used to remove spilled oil from the surface of the water through means of mechanical suction, adhesion, absorption, adsorption, or some similar mechanism of action that allows separation and recovery of spilled oil from the water's surface.
Worst Case Discharge (WCD)	The largest foreseeable discharge. In the case of a tank vessel, a discharge, in adverse weather conditions, of a tank vessel's entire oil cargo

1.0 INTERNATIONAL CONVENTION ON OIL POLLUTION PREPAREDNESS, RESPONSE AND CO-OPERATION, 1990

ARTICLE 6

NATIONAL AND REGIONAL SYSTEMS FOR PREPAREDNESS AND RESPONSE

- 1.1 Each Party shall establish a national system for responding promptly and effectively to oil pollution incidents. This system shall include as a minimum:
- (a) The designation of:
 - (i) The competent national authority or authorities with responsibility for oil pollution preparedness and response;
 - (ii) The national operational contact point or points, which shall be responsible for the receipt and transmission of oil pollution reports as referred to in article 4; and
 - (iii) An authority which is entitled to act on behalf of the State to request assistance or to decide to render the assistance requested;
 - (b) A national contingency plan for preparedness and response which includes the organizational relationship of the various bodies involved, whether public or private, taking into account guidelines developed by the Organization.
- 1.2 In addition, each Party, within its capabilities either individually or through bilateral or multilateral co-operation and, as appropriate, in co-operation with the oil and shipping industries, port authorities and other relevant entities, shall establish:
- (a) A minimum level of pre-positioned oil spill combating equipment, commensurate with the risk involved, and programmes for its use;
 - (b) A programme of exercises for oil pollution response organizations and training of relevant personnel
 - (c) Detailed plans and communication capabilities for responding to an oil pollution incident. Such capabilities should be continuously available; and
 - (d) A mechanism or arrangement to co-ordinate the response to an oil pollution incident with, if appropriate, the capabilities to mobilize the necessary resources.
- 1.3 Each Party shall ensure that current information is provided to the Organization, directly or through the relevant regional organization or arrangements, concerning:
- (a) The location, telecommunication data and, if applicable, areas of responsibility of authorities and entities referred to in paragraph (1)(a);
 - (b) Information concerning pollution response equipment and expertise in disciplines related to oil pollution response and marine salvage which may be made available to other States, upon request; and its national contingency plan.

ANNEX 6

MOIG SHORT ASSESSMENT FORM TEMPLATE

Site Name:	
Operating Company:	
Site Address:	
Site Type:	

1. Oil Spill Response Emergency contact: Yes/No

- 24h Emergency Number: -----
- Contact Name: -----
- Email: -----

2. Oil Spill Contingency Plan: Yes/No

- Developed: -----
- Last update: -----

3. Equipment available:

- Tier 1 equipment available on site: Yes/No

- If yes specify: -----

- Tier 2 and Tier 3 arrangement in place: Yes/No

- If yes specify:-----

- Mutual aid agreement in place (industry/industry – industry/ Yes/No

(government)

- If yes specify: -----

4. Trained personnel available for oil spill response: Yes/No

- If yes specify:-----

5. Oil Spill Exercise organised within last year: Yes/No

- If yes specify: -----

6. Kindly provide your view on possible improvement on oil spill preparedness and response and cooperation in the Mediterranean region.

7. Previous oil spill experiences (Year, location, cause)

ANNEX 7

Opening speech by the International Maritime Organization representative
Stefan Micallef, Deputy Director, Marine Environment Division

It is a great pleasure to be here with you today and I bring with me the greetings and congratulations of International Maritime Organization. I am particularly pleased to see the mix of industry and government representatives since you are the key players for regional co-operation on preparedness and response to accidental marine pollution.

It is well recognized that the process of encouraging effective and sustainable preparedness and response action must be done in a co-operative manner with government and industry participating willingly. The foundation for this lies in the OPRC Convention whilst the catalyst for this process lies in the co-operation of the industry with the IMO and the ability to influence industry activity and governments respectively, both at a national and a regional level through what is know as the Global Initiative. Thus partnership among governments and industry is essential in arranging effective mechanisms for regional pollution preparedness and response. Such a partnership brings us back to the two notions underpinning the Global Initiative; regional outreach and working together.

You will in the next two days be breaking important ground focusing on industry/government cooperation within the context of regional co-operation in the Mediterranean. You would need to chart a way forward on the concrete measures to be taken, in the short, medium and long term to develop and put in place a sustainable mechanism for this cooperation [between industry and governments]. This you would need to do through very frank discussions on the most appropriate formula for a shared responsibility as you consider possibly new and innovative arrangements for this cooperation bearing in mind that this which will require the political will, drive and commitment, at all levels to ensure success in the long term.

Through these discussions you would provide an opportunity for working together and lay the foundations of a reinforced co-operative system between Government and Industry whereby pollution incidents can be efficiently dealt with in Mediterranean waters. In the true spirit of the Mediterranean I am sure that by the end of this week, you would have made inroads to this initiative so that the process that you would have initiated will continue for years to come in the pursuit of our common objectives and that you will also have an enjoyable stay in this historic city.

Ladies and Gentlemen welcome to this Workshop and thank you.
